## SUMMARY

I have been helping teams build web products as a customer-facing Product Owner for nearly 6 years. Most recently, I led the creation of the Digital COA product (MVP deployed at 2 manufacturing sites, with plans to scale across 20+ sites). I'm an expert in product strategy, agile/waterfall delivery, marketing, and operations. A highly organized team player, I thrive as a generalist while also diving deep to create innovative solutions. I hold an MBA and a Bachelor of Engineering from VTU (Visvesvaraya Technological University).
